DESIGN

The BPR Series Belly Pan Retrofit Kit is a great way to modify an existing fixture to T8 or T5 lamp technology while saving time and energy in the process. It is a simple and cost effective upgrade that optimizes light output to meet most utility rebate requirements.

TECHNICAL INFORMATION

Lamp holder brackets and channel cover are constructed of heavy gauge die-formed steel. Designed to retrofit existing 4' and 8' long, 4" and 5" wide existing strip lights. ETL listed as a ballast cover. Ballasts are solid state electronic. All reflective surfaces are finished with a high reflectance, lighting fixture white polyester powder.

Notes: 1-The number of lamps referred to in the description is the number of lamps per cross section. There are two cross sections in a tandem fixture.
